Summary

MERN Stack Developer with 2+ years of experience building production-grade web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Delivered real-world projects including a multi-tenant real estate CRM and full-stack platforms with JWT authentication, REST APIs, Redux state management, Docker deployment, and responsive UI. Comfortable with Agile workflows, Git branching strategies, and CI/CD pipelines.

Technical Skills

Frontend: React.js (Hooks, Context API), Next.js, Redux, Redux Toolkit, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Socket.io

Databases: MongoDB (Schema Design, Aggregation), MySQL

Languages: JavaScript (ES6+), TypeScript (basic), SQL

Tools & DevOps: Git, GitHub, Docker (basic), Vercel, DigitalOcean, Postman, VS Code

Concepts: Agile/Scrum, CI/CD, DSA, Web Performance Optimization

Experience

Mern Stack Developer — Liv Excellence, Bangalore

Jan 2024 – Feb 2026

- Built 15+ reusable React.js components with Tailwind CSS, reducing UI development time by ~30% through a shared component library
- Improved page load performance by 40% using React.memo, lazy loading, and dynamic imports across multiple product pages
- Integrated 10+ REST APIs with JWT-secured endpoints and role-based access control; created custom hooks (useDebounce, useFetch) to eliminate redundancy across 5+ modules

Projects

HomeLineTeam – Home Interior & Furnishing Platform (Next.js, Node.js, Express.js, MongoDB)

[Live Link](#)

- Architected a full-stack platform for a home interior services business — built a public-facing client site with service listings, enquiry forms, and image galleries, alongside a separate admin panel for managing leads, orders, and content
- Admin panel includes full CRUD for services/products, user management with role-based access, and a data analytics dashboard showing enquiry trends and conversion metrics
- Implemented JWT authentication, bcrypt password hashing, and secure REST API integrations; deployed on Vercel with code splitting and lazy loading, achieving a Lighthouse performance score of 90+

Multi-Tenant Real Estate CRM (MERN Stack, Docker, Socket.io, JWT, Redux)

[GitHub Repo](#)

- Built a multi-tenant CRM supporting 5+ real estate companies on a single platform — each company gets isolated data, custom subscription plans (Basic/Pro/Enterprise), and separate Admin and Agent role access
- Features include lead pipeline management, property listings with status tracking, task assignment with deadlines, and an analytics dashboard showing lead conversion rates and agent performance metrics
- Implemented real-time notifications using Socket.io, JWT-based auth with refresh tokens, and containerised the full stack with Docker; optimised MongoDB aggregation queries cutting average API response time by 35%

Brikzy – Real Estate Listing Platform (Next.js, Node.js, Express.js, MongoDB)

[Live Link](#)

- Developed a property discovery platform with 200+ listings featuring advanced search, multi-filter (location, price, type, BHK), and sort options, making it easy for buyers to find relevant properties quickly
- Built a secure admin dashboard for agents to create, update, and manage listings and track incoming leads; implemented user login/registration with JWT auth and ensured full mobile responsiveness across all screen sizes

Education

Full Stack Web Development (MERN), Masai School — Bangalore

2022 – 2023

Intensive 30-week bootcamp: React.js, Node.js, Express.js, MongoDB, DSA, and Agile practices

B.Sc. Mathematics, H.P.S. College, Patna University — Bihar

2021 – 2024

Additional Information

Soft Skills: Communication, Adaptability, Teamwork, Problem Solving

Hobbies: Open-source contributions, Cricket, Singing
